
Sleep Hygiene - Tips For a Better Night's Sleep

Try a Relaxation Technique

1. Don't go to bed unless you are sleepy. If you are not sleepy at bedtime, then do something else. Read a book, listen to soft music or browse through a magazine. Find something relaxing, but not stimulating, to take your mind off of worries about sleep. This will relax your body and distract your mind.

2. If you are not asleep after 20 minutes, then get out of the bed. Find something else to do that will make you feel relaxed. If you can, do this in another room. Your bedroom should be where you go to sleep. It is not a place to go when you are bored. Once you feel sleepy again, go back to bed.

3. Begin rituals that help you relax each night before bed. This can include such things as a warm bath, light snack or a few minutes of reading.

Bedtime Ritual and Routine

4. Get up at the same time every morning. Do this even on weekends and holidays.

5. Get a full night's sleep on a regular basis. Get enough sleep so that you feel well-rested nearly every day.

6. Avoid taking naps if you can. If you must take a nap, try to keep it short (less than one hour). Never take a nap after 3 p.m.

Regulate Your Schedule

7. Keep a regular schedule. Regular times for meals, medications, chores, and other activities help keep the inner body clock running smoothly.

Sleep Hygiene - cont'd

8. Don't read, write, eat, watch TV, talk on the phone, or play cards in bed.

Avoid
Stimulants

9. Do not have any caffeine after lunch.

10. Do not have a beer, a glass of wine, or any other alcohol within six hours of your bedtime.

11. Do not have a cigarette or any other source of nicotine before bedtime.

12. Do not go to bed hungry, but don't eat a big meal near bedtime either.

13. Avoid any tough exercise within six hours of your bedtime.

Work Out
Earlier in
the Day

14. You should exercise on a regular basis, but do it earlier in the day. (Talk to your doctor before you begin an exercise program.)

15. Avoid sleeping pills, or use them cautiously.

16. Try to get rid of or deal with things that make you worry. If you are unable to do this, then find a time during the day to get all of your worries out of your system. Your bed is a place to rest, not a place to worry.

Make Your
Bedroom a
"Stress Free
Zone"

17. Make your bedroom quiet, dark, and a little bit cool. An easy way to remember this: it should remind you of a cave.
